EWCO
ELECTROLYZED WATER CO.

EWCO 240 Pre-Installation Checklist

☐ Tap water source within 6 feet of installation site for connecting to either a 3/8” or 1/2" faucet connector. The hardness of the water cannot exceed 80 ppm.

☐ Electrical outlet (110/120V) within 6 feet of installation site

☐ Area has normal room ventilation. (ie. Cannot be a closed area with no vents)

☐ Installation site is not within 5 feet of a heat source over 750°F (400°C)

☐ Suitable area to mount a bracket for a 15” x 17” x 7” unit that weighs 29 lbs.

(in restaurants, usually mounted above a sanitation sink)

Pre-Installation Preparation

The client is responsible for providing a water source and an electrical outlet. EcoloxTech will provide installation for all equipment and installations add-ons from the point of the water source to the point that the electrolyzed water exits the equipment, holding tank, or constant pressure pump provided by EcoloxTech.

Note: All optional plumbing to carry the electrolyzed water to distant outlets will be the responsibility of the client. Plumbing installed must be constructed of PVC (Polyvinyl Chloride).
